

DETAILED PLANNING

Reduce planning effort by more than 70 percent

Visit our website

THE APPLICATION

Growing data volumes, shorter product cycles, rapidly changing customer requirements: modern production planning is a high art. Flexibility is the order of the day.

Therefore: Say goodbye to analog planning boards, Excel tables and other resource guzzlers!

With the FORCAM application Detailed Planning you use resources optimally, maximize the utilization of your production and reduce your planning effort by more than 70 percent. You have an overview of all orders in real time and recognize bottlenecks immediately. You can react immediately to new customer requests and deadlines and establish an increasingly flexible supply chain.

THE ADDED VALUE

- Production, storage and material costs are reduced
- Planning effort is significantly reduced
- Setup and throughput times are optimized
- Greater adherence to delivery dates, greater customer satisfaction
- Immediate and flexible response to fluctuations and bottlenecks
- Transparency ensures greater decision-making security

FUNCTIONAL SCOPE

- Order management
- Personnel deployment planning including qualification matrix
- Dynamic detailed planning including planning board

WHAT CUSTOMERS SAY

"With FORCAM, we have not only reduced inventory and set-up costs, but also, and above all, improved our delivery reliability to over 99 percent increased."

Martin Strehl, **BorgWarner**
