

## CORPORATE NEWS

# Great interest in the FORCAM Innovation Day China 2020

- More than 4,000 participants in total
- Lecturers from CASICloud, Dynamax, HoneyComb, Kostal and others
- Links to the event-recording and to the new FORCAM website China now available

**Ravensburg / Shanghai, November 2020 - Great interest in China at this year's [FORCAM Innovation Day China](#) (FID China): A total of more than 4,000 viewers joined the two-day online event in mid-November. They listened to contributions from top-level representatives from companies and institutions such as acatech, CASICloud, Dynamax, ENISCO, HONEYCOMB, KOSTAL Group and FORCAM.**

Kuanlun Lee, Managing Director APAC of FORCAM China: "In China, investments for digital transformation processes in discrete manufacturing are continuously increasing. The digital capabilities of Industrial IoT require adequate technology that enables comprehensive connectivity, real-time data and a hybrid infrastructure from on-premise and edge to cloud. Our event was able to provide many answers to these questions. Many thanks to our great guests!"

Interested parties can find the recording of the FORCAM FID under this [link](#).

### [From the agenda](#)

- CASICLOUD: CASICloud helps the digital transformation of manufacturing
- DYNAMAX: Business case of Industrie4.0 from the perspective of IT in Dynamax Smart Factory
- ENISCO: From big data to smart manufacturing—product strategy of ENisco by FORCAM
- FORCAM: Empowering Chinese Manufacturers with Industrie 4.0 & Lean Management
- HONEYCOMB: Featured Industrial Internet platform helps digital transformation and upgrading
- KOSTAL: MES application in automotive electronics industry — OEE implementation cases

At the same time with the FID China FORCAM published the new Chinese homepage of the Smart Factory expert. [Link](#)

China had recently announced that it would place the manufacturing industry at the center of its economic policy. According to media reports, the country's manufacturing industry generated 28.1 % of the sector's global value added last year. This made China the country with the world's largest manufacturing industry for the tenth year in a row.

**About FORCAM** – [www.forcam.com](http://www.forcam.com)

In the era of the Industrial Internet of Things (IIoT), manufacturing companies need a strong and flexible IT backbone in production. FORCAM supports companies in significantly increasing their efficiency in production and planning. FORCAM provides an open and fully flexible IIoT platform solution for intelligent manufacturing. It is rated by analysts as "best in class". The turnkey and freely expandable cloud platform solution is used by internationally active large and medium-sized companies alike - including BorgWarner, Dynamax Aerospace, Howmet Aerospace (formerly Arconic), Kostal, Krones, Lockheed Martin, Richards Industrials, Schaeffler. More than 100,000 machines worldwide are already monitored with FORCAM technology. FORCAM is headquartered in Ravensburg, Germany, with offices in USA (Cincinnati), England (Rugby) and China (Shanghai).
