- 2 FORCAM FORCE™ Common ..... 4**
- 3 Productivity ..... 6**

## 1 General

FORCAM provides companies with all the information they need to control and optimize their production. The modular IIoT solution FORCAM FORCE™ is as flexible as the needs of customers. With a variety of production apps, FORCAM helps companies to make their processes more transparent and improve their workflows. In this way, companies create the basis for optimization measures and sustainable success, thereby ensuring their competitiveness.

FORCAM is always endeavored to optimize the solution FORCAM FORCE™ further, to enrich it with functions and to offer its customers the constantly growing, greatest possible use. For this purpose, several releases are published in the year.

This document lists functions that have been added or changed in the course of the **5.11.13** release. It serves to get an overview of the most important features in order to use FORCAM FORCE™ in the best possible way.

Detailed descriptions of the individual functions can be found in the respective product documentation.

## 2 FORCAM FORCE™ Common

Title	Description	Affected module	Affected area	Status
<p><b>Re-Authentication when changing passwords</b></p>	<p>A re-authentication dialog was added for the password change function. This is implemented for an extra security measure. Previously, when a user wanted to change the password FORCE did not require password re-authentication. Now, there is a dialog where the user or admin must type in and validate the existing password before he/she is able to change to a new password.</p> <ul style="list-style-type: none"> <li>Added a “current password” field to the existing change dialog. This checks to make sure the current password is valid before accepting the new password.</li> </ul> 	Workbench	User Administration	New Changed

Title	Description	Affected module	Affected area	Status
	<ul style="list-style-type: none"> <li>Added a pop-up notification in the User Editor page that will show up if the rules that were defined do not match. Example: In the case displayed below, the rule “Password Changeable” was not activated, so the failure to change the password will be displayed as a pop-up notification on the bottom left.</li> </ul> 			

### 3 Productivity
