

FORCE EDGE CONNECT Installation on Ubuntu without GUI

Version 231009

Content

1	Requirements		3
	1.1	User rights for installation	3
2 Installing FORCE EDGE CONNECT on Ubuntu (without GUI)		4	
	2.1	Download and unzip the FORCE EDGE installer	4
	2.2	User setup	5
	2.3	Installing the EDGE	6
3	Α	ccessing the EDGE Configuration	11

1 **Requirements**

(1) Before installing, ensure that the system meets the system requirements. Details can be found in the System Requirements document for FORCE EDGE CONNECT.

1.1 User rights for installation

It is mandatory to create a non-root user.

The rights must be assigned to the user to be able to correctly install the application.

User:

- Must be a non-root user (name doesn't matter)
- This user must have the right to run the docker + docker compose command
- User ID while installing must be the ID of the current user (number):
 - o *"id"* (command)
- Add the current user into the Docker group:
 - "sudo usermod -aG docker \$USER" (command)

2 Installing FORCE EDGE CONNECT on Ubuntu (without GUI)

- 2.1 Download and unzip the FORCE EDGE installer
 - 1. Open the Ubuntu VM, go to the desired directory and download the installer.

Run: wget <URL of Installationfile> -0 edge_installer.zip Example: wget https://thisIsAExampleLink.com/ -O edge_installer.zip orcam@ffedgevm:~\$ wget https://forcam-my.sharepoint.com/:u:/p/ /EcvoAI7an5JHrtKPytqjfHEB-jlflRvL32ihNi7V3jpD2A?download=1 -O edge installer.zip -2022-05-23 11:25:06-- https://forcam-my.sharepoint.com/:u:/p/ /EcvoAI7an5JHrtKPytqjfHEB-jlflRvL32ihNi7V3jpD2A?download=1 Resolving forcam-my.sharepoint.com (forcam-my.sharepoint.com)... 13.107.138.9, 1 3.107.136.9 Connecting to forcam-my.sharepoint.com (forcam-my.sharepoint.com)|13.107.138.9|: 443... connected. HTTP request sent, awaiting response... 302 Found Location: /personal/ forcam com/Documents/EDGE/Installer/ForceE dgeInstaller-220516.zip?ga=1 [following] -2022-05-23 11:25:06-- https://forcam-my.sharepoint.com/personal/ forcam_com/Documents/EDGE/Installer/ForceEdgeInstaller-220516.zip?ga=1 Reusing existing connection to forcam-my.sharepoint.com:443. HTTP request sent, awaiting response... 200 OK Length: 3723488140 (3,5G) [application/x-zip-compressed] Saving to: 'edge_installer.zip' edge installer.zip 100%[====== ====>] 3,47G 93,4MB/s in 38s 2022-05-23 ll:25:45 (94,1 MB/s) - `edge_installer.zip' saved [3723488140/3723488 140] forcam@ffedgevm:~\$

- For SharePoint links, remove everything behind the last "?" and ad "download=1"
- 2. Unzip the EDGE installer.

```
Run:
unzip <name of the installer>
```

Example: unzip edge_installer.zip

forcam@ffedgevm:~\$ unzip edge_installer.zip						
Archive: edge installer.zip						
inflating:	ForceEdgeInstaller-220516/installer.sh					
inflating:	ForceEdgeInstaller-220516/installer.bat					
inflating:	ForceEdgeInstaller-220516/HowToInstall.md					
inflating:	ForceEdgeInstaller-220516/ForceEdge-install.jar					
forcam@ffedgevm:~\$						

2.2 User setup

1. Check the User ID of the login/created user.

Run: id

2. Add this user to the Docker group so that you can run the Docker command with this user.

```
    Run:
    sudo usermod -aG docker $USER
```

- 3. Verify that user is part of the <u>D</u>ocker group.
 - Run: sudo cat /etc/group

Example:		
messagebus:x:106:		
input:x:107:		
kvm:x:108:		
render:x:109:		
syslog:x:110:		
tss:x:111:		
uuidd:x:112:		
tcpdump:x:113:		
ssh:x:114:		
landscape:x:115:		
<pre>lxd:x:ll6:forcam</pre>		
systemd-coredump:x:999:		
forcam:x:1000:		
docker:x:998:forcam		
forcam@forcam:~\$		

- 4. Restart the system.
 - Run: sudo reboot now

- 5. Check whether the current user has permissions to run Docker and Docker Compose.
 - Run:

docker version

Example:					
forcam@forcam:~\$ do	cker version				
Client: Docker Engine - Community					
Version:	20.10.23				
API version:	1.41				
Go version:	gol.18.10				
Git commit:	7155243				
Built:	Thu Jan 19 17:36:25 2023				
OS/Arch:	linux/amd64				
Context:	default				
Experimental:	true				
Server: Docker Engin	he - Community				
Engine:					
Version:	20.10.23				
API version:	1.41 (minimum version 1.12)				
Go version:	gol.18.10				
Git commit:	6051f14				
Built:	Thu Jan 19 17:34:14 2023				
OS/Arch:	linux/amd64				
Experimental:	false				
containerd:					
Version:	1.6.15				
GitCommit:	5b842e528e99d4d4c1686467debf2bd4b88ecd86				
runc:					
Version:	1.1.4				
GitCommit:	vl.1.4-0-g5fd4c4d				
docker-init:					
Version:	0.19.0				
GitCommit:	de40ad0				
forcam@forcam:~\$					

– Run:

docker compose version

Example:						
forcam@forcam:~\$ docker compose	version					
Docker Compose version v2.15.1						
forcam@forcam:~\$						

2.3 Installing the EDGE

- 1. Open the EDGE installer folder and make the installer.sh file executable.
 - Run: sudo chmod +x installer.sh
- 2. Start the installer.
 - Run:

./installer.sh

- 3. Accept license agreement by entering 1.
 - Run:

1

- 4. Select the directory in which EDGE CONNECT is to be installed and confirm with ENTER.
 - Example:

- 5. Confirm with O and continue with 1.
 - Run:
 - Run:
 - Example:

- 6. Enter User ID and confirm with ENTER.
 - Example:

User Data
Install/Update Configuration
User ID [1000]

- 7. Choose which parts of the EDGE you want to install by pressing 1 or 0 and confirm with enter, then continue with 1.
- (i) For a complete application, at least one EDGE Configuration must be installed. EDGE Configuration and EDGE Node do not have to be installed on the same system.
 - Enter the required number and confirm with ENTER for each application.
 To install the application run:

To NOT install the application run:

Confirm each application with enter

- To Continue after the selection run:
- Example :

0

```
[x] Install/Update Edge Configuration
Enter 1 to select, 0 to deselect:
  [x] Install/Update Edge Node
Enter 1 to select, 0 to deselect:
  [x] Install/Update Machine Repository
Enter 1 to select, 0 to deselect:
  [ ] Install/Update SSL Certificates
Enter 1 to select, 0 to deselect:
  1
```

8. Enter path for the certificates.

Edge SSL Certifications Upload Edge Configuration[] /home/edgeadmin/Downloads/EdgePmTestl/config.crt Edge Node[] /home/edgeadmin/Downloads/EdgePmTestl/node.crt Machine Repository[] /home/edgeadmin/Downloads/EdgePmTestl/machine-repo.crt Press 1 to continue, 2 to quit, 3 to redisplay

- 9. Confirm Docker network settings with ENTER, then continue with 1.
 - Press ENTER
 - Run:
 - Example:

- 10. Select API Key and confirm with ENTER.
- (1) The secret key should be safely stored for future use. It is needed to connect the EDGE Node to the EDGE Configuration.
 - Press ENTER.
 - Example:

User Data
Edge Settings
API Key []
SLF4J: Failed to load class "org.slf4j.impl.StaticLoggerBinder". SLF4J: Defaulting to no-operation (NOP) logger implementation
SLF4J: See http://www.slf4j.org/codes.html#StaticLoggerBinder for further details. Generated API Key : bMpkMERMEMrtRPk2Yvxaeg==

- 11. Confirm Ports with enter and continue with 1.
 - Press ENTER.
 - Run:

Example:

12. Installation is starting.

13. After the installation is finished, the EDGE Configuration can be used.

3 Accessing the EDGE Configuration

- 1. To access the EDGE Configuration, enter https://{hostName}:60066 in the browser.
 - (i) The **{hostName}** is the IP address or domain name of the server on which the EDGE Configuration is installed (e.g., https://**10.48.116.64**:60066).
- After the initial installation, log in with the default user: Email: test@mail.com Password: Force2020&k
 - (i) For security reasons, the default user data should be changed, and the new account information should be kept secure.
